World Class Engineered Aluminum Structures

ALUSPHERE®

Our aluminum dome ALUSPHERE® is built by a triangulated profile system, covered with triangular panels. Besides the advantages of the use of structural aluminum, these covers:

- *ALLOW LARGE DIAMETERS: Its clear span design eliminates the need for intermediate columns and reinforcement of tank walls, with spans above the 100m.*
- *HAVE OPERATIONAL FLEXIBILITY: Allows the installation of accessories, like doors, hatches and connections.*

25 years

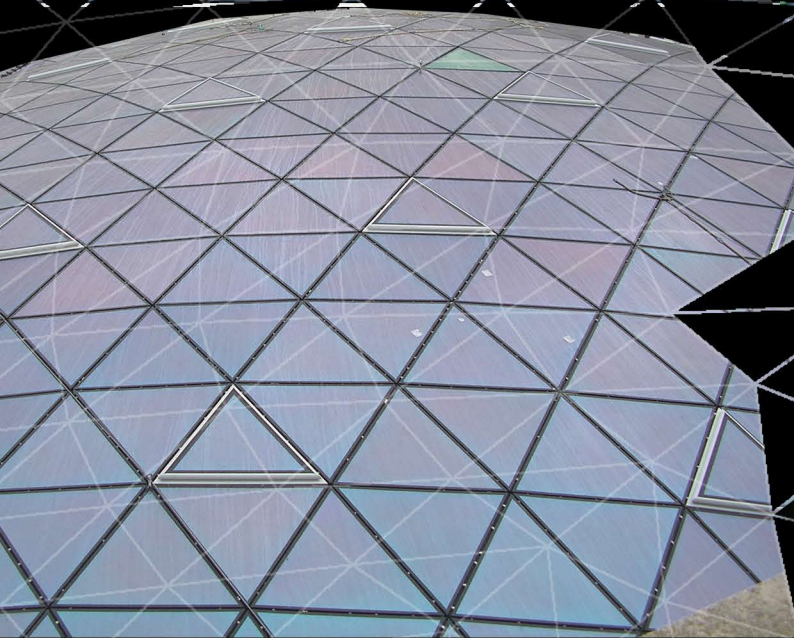

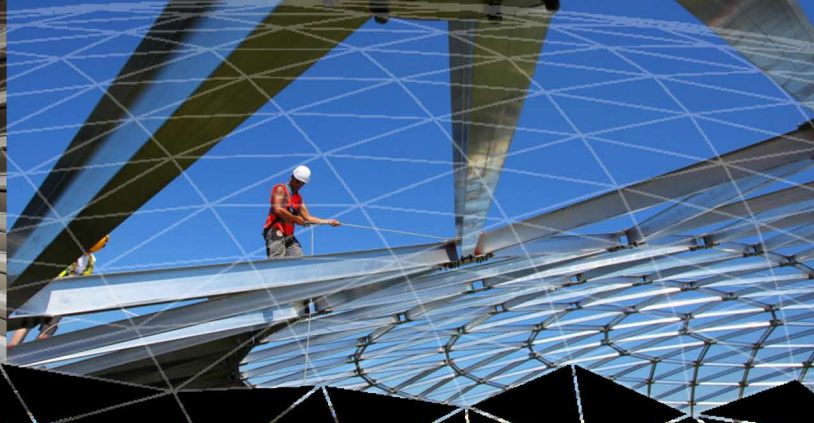

FLAT ROOFS, Alugreca® Aluplan®

The ALUGRECA® and ALUPLAN® roofs are built from a shaped aluminum sheet with the following advantages :

- *ANY CONTOUR : Fit in circular, square or irregular shapes.*
- *LARGE SPAN : Ranging from 3m to 80 m free span.*
- *OPERATIONAL ACCESS : Total or partially removable for maintenance operations.*
- *LOW PROFILE : Reducing air volume for odour treatment.*

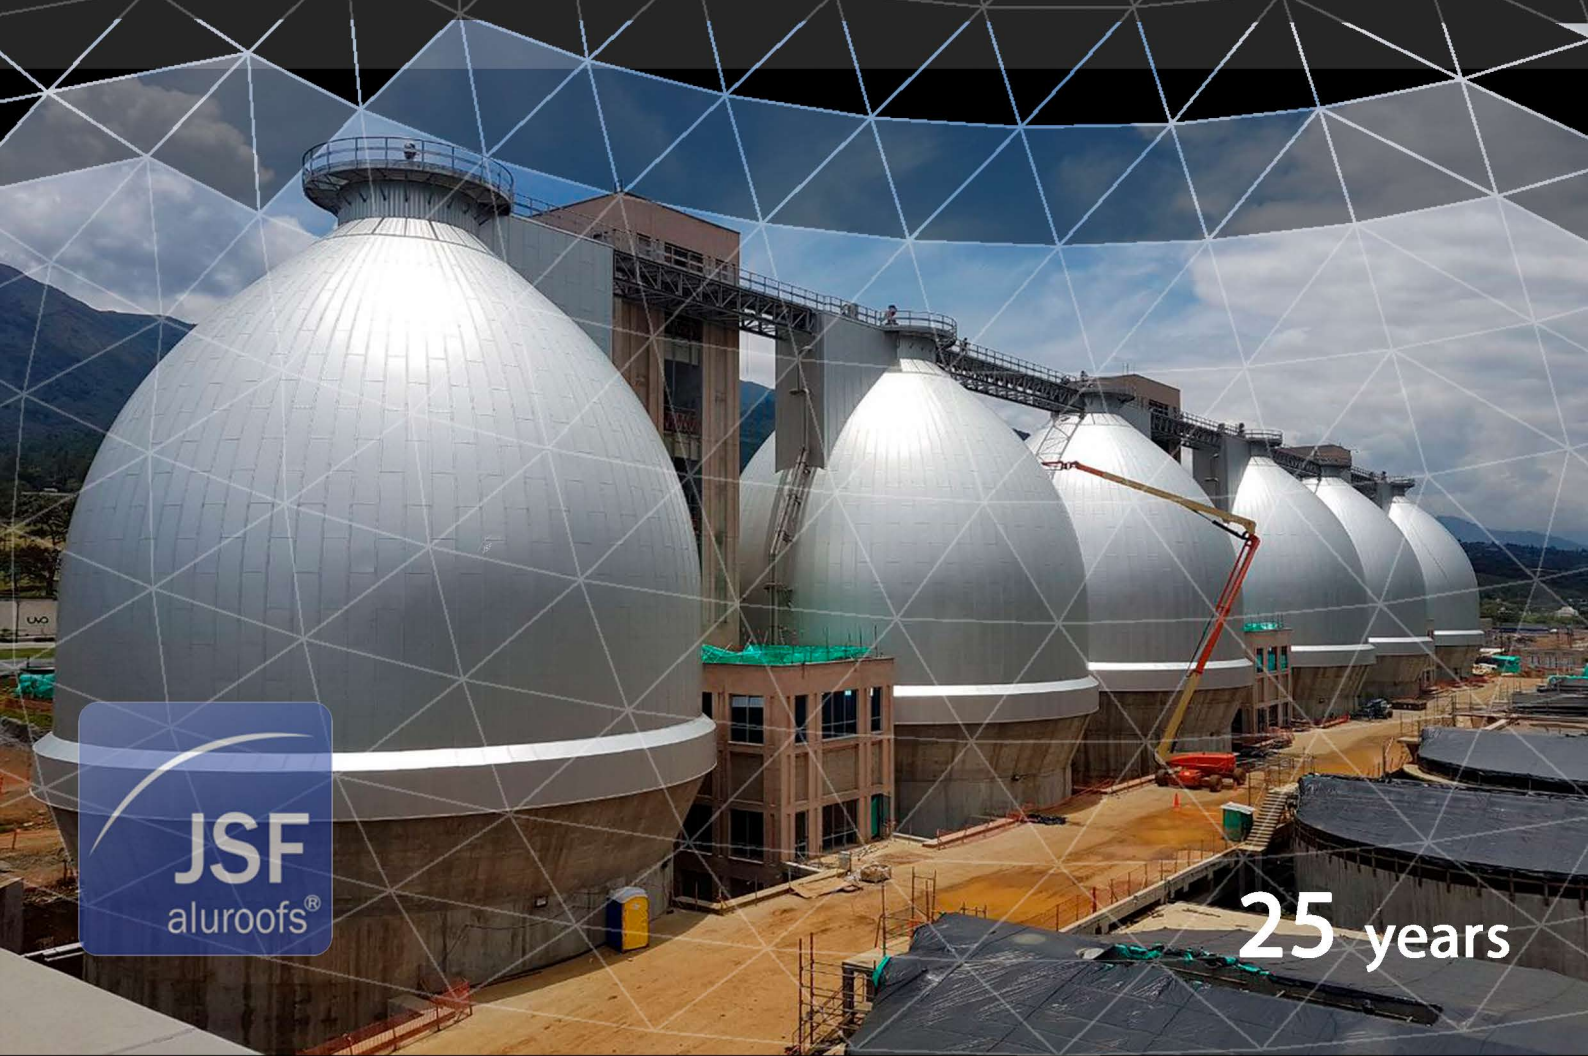

ARCHITECTURAL

- *A wide variety of shapes and configuration*
- *High engineering and precision level*

- *Corrosion resistant material*
- *Recyclable*

25 years

TECHNICAL RESOURCES

- *Specialized in the most prestigious standards worldwide.*
- *The most powerful FEM commercial and own developed software.*
- *A skilled staff of high technical-profile engineers.*
- *Engineering to customer requirements.*

25 years

MANUFACTURING

JSF
hidráulica

- *More than 7.000 SM warehouses available*
- *Engineering to order process*

- *Automated process*
- *High quality standard*

25 years

WORLDWIDE

- *More than 2,000 structures*

- *References in more than 30 countries*
